

ANDRE ENE

Frontend Software Engineer · AI Applications · React · Next.js · TypeScript

Lagos, Nigeria · Open to Remote · iameneandre@gmail.com · linkedin.com/in/andreene · github.com/dev-eneandre · Portfolio

Professional Summary

Frontend Software Engineer with 3+ years of experience building and shipping production web and AI-powered applications for startups across fintech, civic tech, sustainability, and SaaS. Experienced in designing scalable products with React, Next.js, TypeScript, and Node.js, while integrating LLM-powered features including AI assistants, intelligent document processing, and workflow automation into real-world applications. Proven track record of owning features from architecture through deployment, collaborating across product and engineering teams, and delivering reliable, user-focused solutions. Passionate about building AI systems that solve real business problems and eager to take on increasing technical ownership in high-growth engineering teams.

Available for full-time remote roles.

Technical Skills

Core	React, Next.js, TypeScript, JavaScript (ES2022+), HTML5, CSS3
State & Data	Redux Toolkit, RTK Query, Context API, React Router, Zustand
Styling	Tailwind CSS, ShadCN UI, Material UI, Ant Design, Styled Components, SASS/SCSS
Backend / APIs	Node.js, Express.js, RESTful APIs, WebSockets, Asynchronous patterns
Tooling	Git, GitHub, Webpack, Babel, Vercel, CI/CD Pipelines, Firebase, Figma
CMS / Auth	Contentful, Sanity.io, Clerk Authentication, Liveblocks
Performance	Core Web Vitals (LCP, CLS, INP), Code Splitting, Lazy Loading, Technical SEO
Methodology	Agile / SCRUM, Kanban, Sprint Planning, Code Review

Professional Experience

Senior Frontend Developer | **Cashraa AI**

October 2025 – March 2026 · Remote

- Rebuilt the core financial tracking dashboard from scratch, delivering a responsive, data-driven interface with real-time updates.
- Designed and integrated an AI-powered financial assistant using LLM APIs, enabling users to chat with their financial data, summarize account activity, explain transactions, and generate natural-language insights.
- Integrated third-party services including authentication, payments, maps, and CMS platforms with secure API key and environment variable management.

- Collaborated with product and marketing teams to implement analytics instrumentation and conversion-focused features for a live fintech application.
- Partnered with cross-functional teams to ship production features for an active fintech product serving real users.

BorderLink — AI Travel & Document Management Platform -

<https://www.borderlink.app/>

- Implemented AI-powered document analysis, allowing users to scan passports, visas, and travel documents and extract structured information automatically.
- Developed responsive user interfaces with Next.js and TypeScript, integrating OCR and AI services for intelligent document processing.
- Built secure upload, storage, and retrieval workflows for sensitive travel documents.

Front-End Developer | Arebak LLC

June 2023 – September 2025 · Dayton, Ohio, USA · Remote

- Owned the full deployment lifecycle of a production Next.js / TypeScript / React application on Vercel — including SSR/SSG configuration, environment variable management, preview environments, and production releases.
- Optimised Core Web Vitals (LCP, CLS, INP) through code splitting, lazy loading, and performance-focused component architecture, bringing pages into Google's "Good" threshold.
- Built a grant-matching AI platform for US small businesses, integrating third-party APIs and dynamic filtering logic to match applicants to relevant funding sources — improving financial accessibility for under-served communities.
- Designed and implemented a geospatial tree-health and contractor-activity dashboard for Sheltera using Ant Design and Leaflet maps, replacing a manual reporting process and improving operational visibility.
- Developed a credentialing web application for HireGround One Credential within a mono-repo architecture, collaborating closely with backend engineers on data flows and access control.
- Built Black Sustainability's website and interactive mapping app enabling members to discover like-minded organisations by geography, with role-based conditional access to sensitive information.
- Revamped the UI of an OSTicket system for a civic rights organisation, aligning the interface pixel-perfectly with Figma designs and reducing support-team friction.
- Delivered a multilingual Bible application with audio playback and parallel-screen functionality, improving accessibility for a global user base.
- Built a carbon credit trading platform UI for African markets, working with backend developers on secure API integrations and real-time data display.
- Established shared component libraries and standardised development workflows, accelerating feature delivery across parallel project tracks.

Junior Front-End Developer | Cashflakes

September 2022 – March 2023 · Abuja, Nigeria · Remote

- Redesigned a cryptocurrency web application using React.js, Bootstrap, and Redux Toolkit — resolving critical bugs, improving form validation, and strengthening state management across mobile and desktop.
- Built and standardised reusable UI components shared across the codebase, cutting estimated future development time by ~25% per the engineering team's assessment.
- Ensured seamless RESTful API integration and cross-browser compatibility across the full product, collaborating daily with design and backend teams.

Notable Projects: <https://devandre-dark-portfolio.vercel.app/>

- **AI Agent SaaS** — AI-powered research and content creation tool. Users can transcribe videos, chat with AI about content, generate summaries, create thumbnails, and craft video titles. *Stack: Next.js, TypeScript, OpenAI API*
- **Video Streaming Platform** — Scalable real-time video streaming and chat application built for concurrent users, with a focus on performance and accessibility. *Stack: React, TypeScript, Clerk, Stream, Convex* [View →](#)

Available immediately for full-time remote roles. Comfortable working across UTC±3 to UTC-8 time zones.
